ABSTRACT OF THE DISCLOSURE

Compositions , containing a ruthenium(III) complex and a heterocycle, methods for their manufacture, medicament containing these compositions and a kit.

The invention relates to a composition (A), obtained by reacting a compound of the

5 general formula (I)

$$\begin{split} &M_{3\text{-n-p-2pr}}[RuX_{6\text{-n-p-q-2r}}B_n(H_2O)_p(OH)_q(O)_r]_{2r+1}(I)\\ &\text{with a compound of the general formula (II)} \end{split}$$

 $B'(HX')_S$ (II).

Furthermore, the invention relates to a composition (B), obtained by mixing a compound

10 of the general formula (III)

$$\begin{split} &(B'H)_{3\text{-n-p-2pr}}[RuX_{6\text{-n-p-q-2r}}B_n(H_2O)_p(OH)_q(O)_r]_{2r+1} \quad (III)\\ &\text{with a compound of the general formula (IV)}\\ &MX'(IV). \end{split}$$
